## Application notes:

Suitable for lead-free, reflow-soldering profiles per DIN EN 61760-1 and IEC 60068-2-58 up to max. 260°C peak temperature. Due to customer-specific variables (e.g., component configuration and orientation, type of soldering machine, solder paste), trial runs are recommended to ensure product and process compatibility under actual manufacturing conditions.

## Recommendation for SMD stencil:

150 µm material thickness; pattern layout identical to solder pad layout

Push-in termination of solid conductors

Inserting/removing fine-stranded conductors by lightly pressing on a push-button (e.g., via 206-860 Operating Tool).

Terminal blocks can be arranged side-by-side without loss of poles.

Available in tape-and-reel packaging for automated assembly
