■Usage Precautions

1. Plugs

(1) Connection/ disconnection of connectors	1) To disconnect connectors, insert the end portion of U.FL-LP-N-2 and U.FL-LP(V)-N-2 under the connector flanges and pull off vertically, in the direction of the connector mating axis. 2) To mate the connectors, the mating axes of both connectors must be aligned and the connectors can be mated. The "click" will confirm fully mated connection.Do not attempt to insert on an extreme angle. (2) Permissible load on the cable after connector are mated.	After the connectors are mating, do not apply a load to the cable in excess of the values indicated in the diagram below. (3) Precautions	Do NOT forcefully twist or deform wires.

2. Receptacles

(1) Recommended soldering temperature profile	 1) The temperature profile indicates the board surface temperature at the point of contacts with the connector terminals. 2) The temperature profile will change depending on conditions which include such factors as the size of the board, the solder used, and the solder thickness.
(2) Recommended manual soldering	Manual soldering: 350˚C for 5 seconds
(3) Recommended screen thickness	0.1 to 0.15 mm
