1. OSTSen-30102 Overview

OSTSen-30102 is a pulse oximetry and heart-rate monitoring module, which is based on Maxim Integrated MAX30102. The MAX30102 is an integrated pulse oximetry and heart-rate monitor modules. It includes internal LEDs, photodetector, optical elements, and low-noise electronics with ambient light rejection. The MAX30102 provides a complete system solution to ease the design-in process for mobile and wearable devices.

The MAX30102 operates on a single 1.8V power supply and a separate 5.0V power supply for the internal LEDs. Communication is through a standard I2C-compatible interface. The module can be shut down through software with zero standby current, allowing the power rails to remain powered at all times.
