testo 512

testo 512 shows pressure and flow simultaneously in an easy-to-read, large, backlit display. Measurement data is printed on site with date and time as well as minimum and maximum values. testo 512 has two switchable units for flow: m/s and fpm. Eight units can be set for pressure: kPa, hPa, Pa, mm H₂O, mmHg, psi, inch H₂O, inch Hg.

Adjustable smoothing for gliding mean calculation, density compensation is built-in. The displayed actual value can be frozen in the display by pressing the HOLD button. The measured minimum and maximum value can be displayed and stored in the meter.

TopSafe protects the meter in the field from impact, dirt and splash water.
